Balcony	Concrete floor			Glass fencing with steel railing
Loggia	Betontegel op tegeldrager	Wood / Plywood	Wood wool cement (white)	Glass fencing with steel railing
Particularities				
<ul style="list-style-type: none"> - The Studio's (type A, B, C) have a laminate floor; - The walls are either constructed in precast concrete or in Habito plating. The visible sides are finished with vinyl wallpaper (excluded storage); - The outside frames are made of plastic, inside white and outside anthracite; - The inner frames are sheet steel frames in white (RAL 9010); - The interior doors and any sliding doors are designed as rebated doors or as a sliding door (RAL 9010) and finished with aluminum fittings; - An electronic online access control and locking system has been applied to the entrance door of the apartment and to the doors of the common areas; - The position of the underfloor heating valves differs per type and is indicated on the floor plan. If the floor valve is not placed in the storage room, an MDF housing (RAL 9010) is placed over the floor valve; - The ventilation is regulated by a climarad system, for this purpose climarads have been included at varying positions against the walls; - The living rooms are equipped with a wired internet connection, the separate master bedroom, if present, is only equipped with an empty pipe; - The houses are equipped with a smoke detector; - The houses are not standard equipped with a connection for a washing machine. There is a communal laundry on the ground floor. For house types that do have a private washing machine connection, this is shown on the floor plan; - The layout of the facades changes per floor, so the floor plan may show a different layout of windows
